## Synopsis

This book contains 28 dehydrated recipes for your dog and the Homemade Dog Food Guide is included for free. Whether you want to add some healthy treats to your dog's diet, top off your dog's regular food with something irresistible, or make the switch entirely to homemade food, you'll find great ideas here. You no longer need to worry about tainted treats, or what chemicals are hidden in your dog's food. The Dog Food Love series is what I've learned after 14 years dealing with my dogs' many allergies and making homemade foods for them off and on since 2000. Now after three years of feeding my dogs only homemade foods I've put this together in eBook format. The treats alone are worth it, so I'm told, even if you don't want to change to 100% homemade food. Disclaimer: The author of this book is not a veterinarian. The author shall not be liable in the event of incidental or consequential damages or loss in connection with, or arising out the use of instructions or suggestions in this book. This book provides information of a general nature and should NOT replace the consultation of a qualified veterinarian or veterinary nutritionist. It is the reader's responsibility to consult with a veterinarian or veterinary nutritionist before making any changes to your method of feeding, grooming, or any other matter of care for any dogs for which you have responsibility. The meal recipes are intended for adult dogs, NOT for puppies, pregnant, or senior dogs. Puppies, pregnant, and senior dogs have unique requirements. The treats and special occasion recipes should be good for dogs of all ages, as long as the main meals follow the recommendations of your veterinarian for your dog's unique needs. The Getting Started Guide, was originally published in a series of blog articles on the author's website. The guide is included in a similar way in other books in the Dog Food Love series for free, as a reference.

## Customer Reviews

I was torn between 3 and 4 stars. The first part of the book touches on all diets for dogs without going into any detail. The second half of the book is on dehydrated foods (the title should have told you that). For a book that is about dehydrated foods I was very disappointed with the chapter (1/2 page) on buying a dehydrator - I didn't find it any help what-so-ever, and this is an important factor if you plan on making your own dehydrated dog food. I did find lots of useful tips in the book, and it is a decent size (even factoring in the pages devoted to chapter titles-- not sure that was a good editing choice) and that's why I ended up giving it 4 stars (if I had 3.5 stars I would have went here instead)
