Grade Level: 3 - 7

Customer Reviews

I'm a child therapist that specializes working with AD/HD kids, and this is a must have working with kids with AD/HD, or parenting a child with AD/HD. Instead of simply reading about AD/HD, kids are able to do activities learning about and learning to take responsibility for their AD/HD.

Activities are good if you have a somewhat creative child. My child is not completely great with using the book but he was able to learn about being ADHD. We sat down and read parts of the book together. My son is 6 and most of the book was way ahead of his age. I would recommend for a preteen.

I purchased the book for the child of a close friend of mine. This book is helping her understand her feelings as well as specific challenges she faces because of her ADHD. I recommend this book to every child with ADHD. The book is designed in a very child friendly way.

I purchased this to use with my 11-year old granddaughter. I wasn't sure if I would be able to get her to work with it because of her "attitude"? But it turns out she loves this workbook, it gives her a chance to say what SHE feels and she was surprised that I got it for her and that I actually cared! So I am recommending that everyone try it.

Was happy to see that this has been updated in such a current and (very) useful style! I had stopped using the first edition, because it was almost obsolete. You won't be disappointed having this in your tool box with these updates. .

I'm a postdoc working with middle schoolers two days a week, and this far they have all responded well to this workbook; a rarity in our field.
